

## MF57 Series NTC THERMISTOR

MF57 Series thermistor is unleaded disc thermistor for engine temperature measurement.

### FEATURES:

- High reliability and long life
- Suitable for probe mounting
- Normally used for gauge driving under self-heated conditions
- Wide temperature range

### APPLICATIONS:

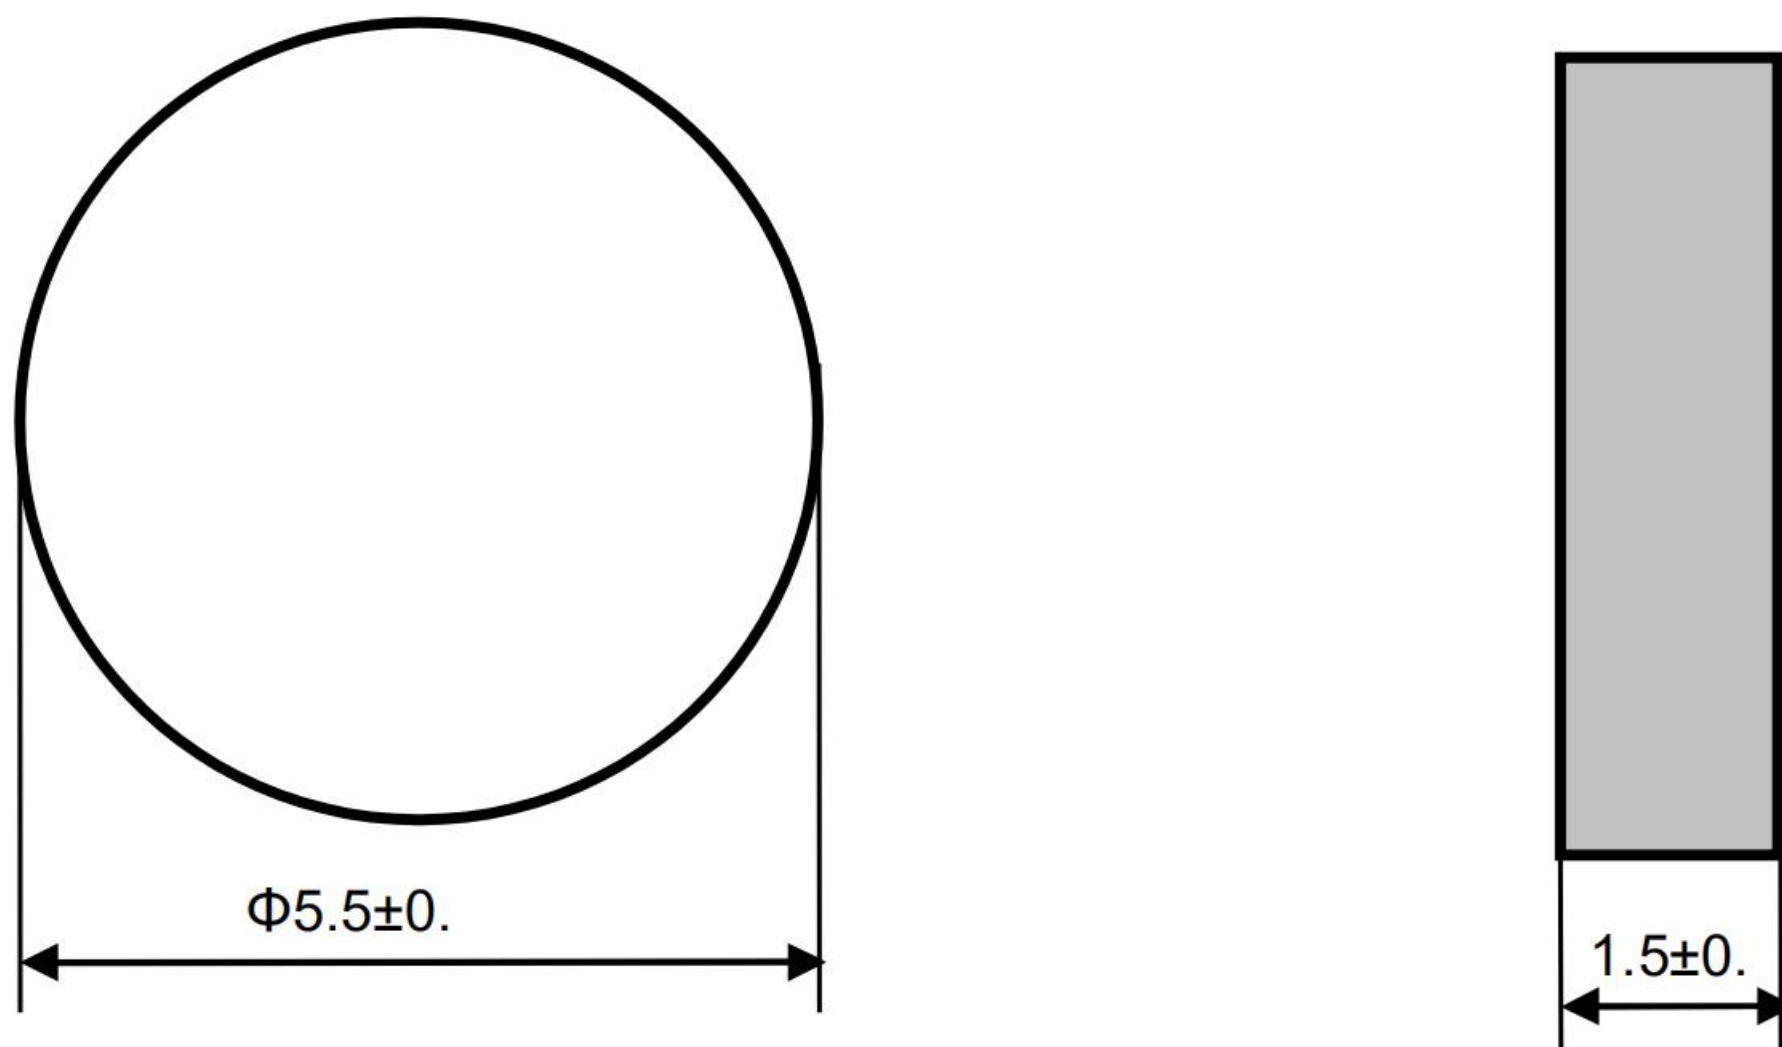

- Temperature sensing and measuring in automobile cooling system
- Larger power electric engine
- Combustion engine
- Oil transformer etc.

## MF57 Series NTC THERMISTOR

### DIMENSIONS (mm):

MF57:

### ELECTRICAL CHARACTERISTICS:

Type	Dissipation Constant (mW/°C) In still air	Thermal Time Constant (s) In still air	Working Temp.
MF57	$\geq 1$	$\leq 30$	-40°C~125°C

### PACKAGING:

Packaging Option	Standard Quantity
Bulk	200pcs/bag
